

HIGHLIGHT HQ^{II}

Desktop Illuminator

Gordon's Highlight HQ^{II} . . . a Brilliant Idea

This little desktop illuminator with quartz light technology packs a lot of power—15,000 candlepower at the viewing surface. Controlling the variable intensity with a foot pedal, you can quickly and easily examine all types of films, including mammograms and multifformat films, up to 4.0 density. And the internal fan keeps it cool.

Use the flexible swing-in magnifier to bring out the fine detail. Use the optional iris attachment to mask distracting glare while enhancing contrast. Use it anywhere it's needed . . . it's small, lightweight, and portable.

With its many unique features, you will find yourself depending upon the Highlight HQ^{II} for that clear, magnified image . . . it's simply a brilliant idea.

When Seeing Means Understanding

HIGHLIGHT HQ^{II}

Product Specifications

Quartz Lighting Technology

The extreme light intensity—up to 15,000 candlepower (160,000 lumens)—is great for viewing dark films.

Quick and Easy Lamp Replacement

Foot Pedal Controlled Variable Light Intensity

With the ability to control the light intensity with the foot pedal, you can quickly and easily examine all types of films, including multiformat films, mammograms, and all films up to 4.0 density.

Cool Plate Illumination Surface

Measures 6" wide by 4" high

Stem Mounted, Round Magnification Unit

To bring out fine detail, use the flexible swing-in magnifier.

Portable

Small and light (7 pounds), the Highlight HQ^{II} can be taken anywhere it's needed.

Measurements of Unit

9" high, 8" wide, and 8" deep

Optional Variable Iris Attachment

The optional iris gives the user the ability to mask down to smaller areas and eliminate distracting flare while enhancing the contrast on your films.

Highlight HQ^{II} with Variable Iris Attachment
